Work History

2018-06 -
Current

Swaas System Pvt Lmt

Software Developer, Chennai, Tamil Nadu

Project 1 - IOT With Various Cloud Services

- Developed an IoT project for controlling and detecting water leakage in real life using **Aws services**.
- Build wireframes and prototypes for a better understanding of the project using designing tool **Figma**.
- Technologies used - Excess services like Aws IoT core, Aws Lambda Functions, Aws SNS and Push Notification, Aws DynamoDB (NO SQL DATABASE), EC2 Instance, IONIC.

Project 2 - Delivery Project Manager Tool

- Design wireframes and prototype using Balsamiq tool.
- Front Office: Where end client can track, place an order (Device) with configurations as per the requirement.
- Back Office: Where the Delivery project Manager can verify the client order and approving it for the provisioning.
- Integration was done with an existing client API's to complete the life cycle of an order.
- Technologies used Node js, Mysql Database, Angular.

Project 3 - Email Trigger (Automation Marketing Tool)

- Work closely with other development teams and infrastructure specialist of our company.
- Created a common tool for different teams to create email templates, configure targets, scheduling emails for marketing.
- Cron job functions were implemented for

Node js, Sequelize, express

Angular js, Angular Material

HTML, CSS, Bootstrap,
Jquery, Javascript

Syncfusion

automation sending of emails.

- Technologies used - php , Code Ignitor (MVC Framework), Mysql Database, Jquery, Javascript, Html, Bootstrap.

Project 4 - Live project - Worked as a full stack developer in a campaign marketing tool

- My job was to create different campaigns (microsites) for different clients as per the requirement.
- Email template creation and enhancement work within an existing system.

Peronsal Learning

Jatin Nandwani

1 - Instagram bot

- Puppeteer a Node library which provides a high-level API to control Chrome or Chromium over the DevTools Protocol.
- Automatically the login will happen in the backend with provided username and password, will redirect to assigned pages and open up the recent images, like them and close them. Redirects to another page as per the input, it varies.

2 - Error logging and masking in node js using Bunyan library.

- Logs have been an essential part of troubleshooting application. Log data contains information such as out of memory exception or hard disk errors.
- The main reason for applying masking to a data field is to protect data that is classified as personally identifiable information.

3 - Web Scraping with node js and cheerio

- Web scraping is done which will open up the medium home page in the backend and fetch all the unique links from the medium home page.

4 - Online Super Market - In Angular

- Use and customize angular material components.
- Various concepts to learn and teach my friends.

Education

2012-04 -
2014-04

Bachelor of Science

Delhi Public School - Faridabad, Haryana

2014-04 -
2018-04

Bachelor of Computer Science

SRM UNIVERSITY - Chennai, Tamil Nadu

Interests

Devops and cloud computing
